Le miroir PyPI local du pauvre

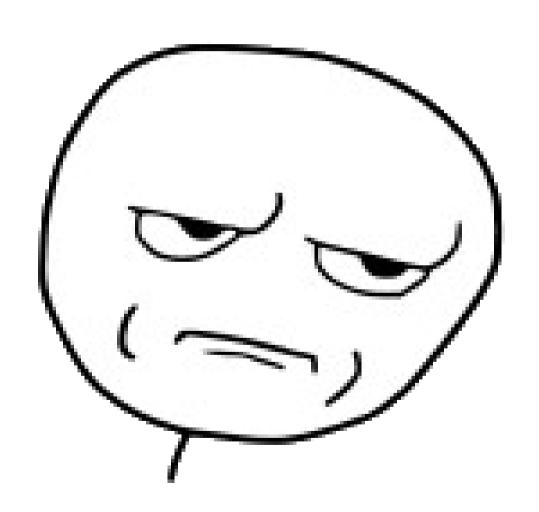

http://www.flickr.com/photos/paulk/136795301/

http://www.flickr.com/photos/sifalcia/2445454326/

POURQUOI?

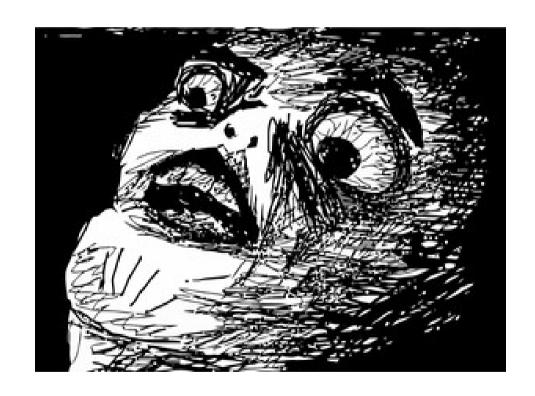

PyPI Down

Nouvelle version incompatible

Paquet supprimé

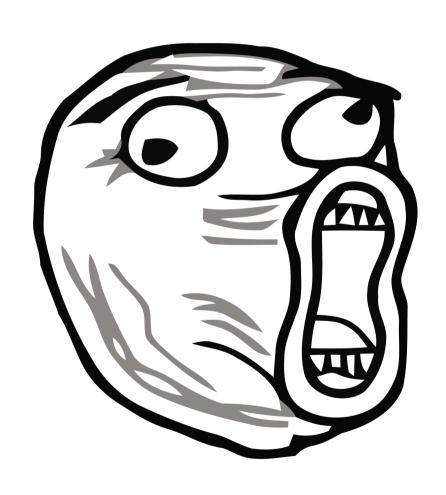

F7U12

Solutions

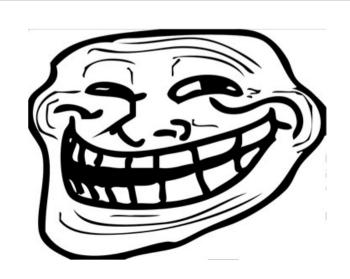

- Basketweaver
- Chishop
- Localshop
- Crate.io
- Pep381client
- z3c.pypimirror

Mais je suis fainéant

Le sauveur

```
pip --find-links --no-index
pip --find-links --index-url
```

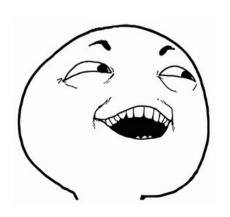

requirements.pip

```
-e git+ssh://git@github.com/clintecker/django-
google-analytics.git#egg=django-google-
analytics
```

django-sentry

psycopg2==2.4.2

Faire télécharger les paquets à pip

Faire servir le répertoire

```
cd pypi
```

python -m SimpleHTTPServer

http://localhost:8000

Modifier requirements.pip

```
-e git+ssh://git@github.com/clintecker/django-
google-analytics.git#egg=django-google-
analytics
```

django-sentry

psycopg2==2.4.2

Modifier requirements.pip (Like a Boss)

```
--find-links http://localhost:8000
--index-url http://localhost:8000

-e git+ssh://git@github.com/clintecker/django-google-analytics.git#egg=django-google-analytics
django-sentry
```

psycopg2==2.4.2

Profit

pip install -r requirements.pip

Des Questions?
